DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities: On page 1 of the specification the Patent Serial Number should be provided. Appropriate correction is required.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1, 24 and 27 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 1, 24 and 27 are not tangible. The preamble of independent claims 1, 24 and 27 recite A method for previewing the appearance of clothing as worn using a mobile communication device having a display, wherein the clothing item has an associated clothing item ID, comprising: ", which is directed to software, per se, lacking any hardware to enable any functionality to be realized. The claimed features and elements of independent claims 1, 8, 10,17 and 19 do not include hardware components or features that are necessarily implemented in hardware. Therefore, the claimed features of claims 1, 8, 10,17 and 19 are actually a software, or at best, directed to an arrangement of software, and software claimed by itself, without being executed or implemented on a computer medium, is intangible.

To expedite a complete examination of the instant application, the claims rejected under 35U.S.C. 101 (nonstatutory) above are further rejected as set forth below in anticipation of the applicant amending these claims to place them within the four statutory categories of invention.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-29 are rejected on the ground of nonstatutory double patenting over claims 1-22 of U. S. Patent No. 6,661,433 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: tag providing an image of the clothing item, comprising: accessing the clothing item image from the tag; overlaying the clothing item image onto a stored image of at least one of a user of the mobile communication device and a second person to produce a composite image; and displaying the composite image on the display.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See also MPEP § 804.

Allowable Subject Matter

Claims 1-29 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance:

Applicant has claimed uniquely distinct features in the instant invention which are not found in the prior art either singularly or in combination. They are a method of receiving the clothing item ID; accessing a clothing item image based upon the clothing item ID; overlaying the retrieved clothing item image onto an image of at least one of a user of the mobile communication device and a second person to produce a composite image; and displaying the composite image on the display. These features are not found or suggested in the prior art.

The closest prior arts, Addy (USPN 6,386,448) and Mosher, Jr. et al. USPN (5,979,941) discloses a conventional operating department store retail system in order to perform a purchase transaction system; either singularly or in combination, fail to anticipate or render the above underline limitation obvious.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure (see PTO-892).
